Consulcad offer specialist project services to property managers, portfolio operators and real estate professionals. Providing assistance delivery business with expertise in infrastructure, facilities management, state and local governments, utilities, property and real estate.

We provide GIS and data management services to our clients, ranging from strategic advice to outsourced GIS and Asset Management data capture.

We have worked with clients in the Asset Management field since the late 1980s and have seen the industry transition from new and raw technology to sophisticated processing and analysis. Many organisations are now transitioning to second or third generation solutions and require a new set of skills from external consultants.

Our services have evolved with our customers and the technology. We focus on system implementation/integration, project management and data conversion/migration. Many of our staff have dual qualifications in areas including Surveying, Asset Management as well as IT and project management.

Consulcad are members of a range of Government Panels including:
