

The Western Australia Department of Health Selects Consulcad and Instantis EnterpriseTrack™ to Consolidate PMO and Expand IT Service Offerings

Consulcad, partnering with Instantis, led the planning and deployment of an operational PMO for the Western Australian Department of Health. This included implementation of new PMO processes and supporting technology.

October 15, 2011 – Perth, Australia —The Western Australia Department of Health has partnered with PMO Services consultancy, [Consulcad](#), to assist with the design, launch and on-going management of its newly consolidated Project Management Office (PMO). The Enterprise Project Portfolio Management (EPPM) system from [Instantis](#) called EnterpriseTrack™ PMO Edition was selected to provide the technology infrastructure.

The WA Department of Health provides health care services to nearly 2.3 million people and its Health Information Network (HIN) is responsible for implementing the Information and Communications Technology (ICT) project portfolio. The previous structure of HIN included two Project Management Offices (PMOs), each with its own project focus, personnel, practices and tools.

According to Consulcad, the key challenge was to assist with the integration of the two PMOs into a single office and introduce common tools, methods and systems to deliver a range of PMO services for major projects. Having met this challenge, Consulcad helps ensure the sustainability of the PMO in the near-term by providing experienced programming and scheduling experts to deliver master program planning and dependency management by leveraging the EnterpriseTrack™ scheduling and resource management functionality.

In the long term, the company continues to work with HIN post implementation in order to undertake PMO Quality Reviews, by providing recommendations and support as required to Consulcad continue assist in implementation of process and technology improvements post implementation.

“We believe that the Consulcad-Instantis team is well positioned to expand our enterprise project and portfolio management solution across the Australian government and commercial sector,” said David Henderson, Consulcad Director.

About Consulcad

Consulcad is a project services and solutions consultancy that helps organizations to bridge the gap between strategy and delivery.
