

Make the right decisions using edison365businesscase

Optimise your internal processes, ensure visibility and accelerate business transformation

Currently business cases are inaccessible, unregulated, slow to progress and hard to evaluate. This lack of visibility makes it impossible to assess their likelihood of success or to troubleshoot issues as they arise.

edison365businesscase provides a transparent and repeatable method of capturing business case data that ensures standardisation and accountability across fully configurable processes and case types. Built on Office 365, the intuitive interface gives you the organisation-wide visibility needed to understand the financial and resourcing requirements of successful business transformation, as well as its potential benefits.

Accelerate approval

Spot trends, identify bottlenecks and easily solve problems to avoid costly and inefficient delays.

Complete visibility

Understand the cost, benefit, resource requirements and ROI across the entire portfolio of business cases.

Fully configurable

Build multiple templates, forms and approval stages aligned to your own processes and financial sign off limits.

Built on Office 365

Engaging user interface and a familiar set of tools ensures immediate adoption and positive user experience.

Standardise, understand and accelerate your business case processes

edison365businesscase enables rapid justification for business transformation

Portfolio reporting

Report cost, benefit and resource requirements across one or more business cases to understand potential impact on live and future work.

Optimized business case approval

Set target timescales for each approval stage. Easily assign reviewers and discover where (and with whom) a case has stalled.

Drag-and-drop business case templates

Build the perfect template for the size or type of case required and configure stages to align with your internal processes.

Clear data visualization

Configure standard tables to present large amounts of information efficiently. Users can switch between multiple visualizations to allow effective engagement with data.

Personalised access

Variable views are available depending on individual permissions and approval rights. The personal page keeps track of what needs approving, when and where issues lie.

Full version control

Entire audit trail visible via stored case history, supporting internal compliance requirements.

Comprehensive device and end user access

Use multiple devices to access information; Windows, iOS®, and Android™. Different users can use different devices and different browsers to suit their personal ways of working.

Zero training

The intuitive UI ensures instant solution adoption.

Built on Office 365

Leverage your existing Microsoft investments to enable more effective collaboration and efficient ways of working.

The end-to-end business transformation platform built on Office 365

The edison365 suite provides a unique and comprehensive platform to accelerate business transformation. Each module can be used standalone or alongside one or more of the other modules in the suite to provide an end-to-end solution.
