Everything you need in one solution

edison365**projects** includes many of your online project requirements:

Portfolio modelling

Easily perform 'What if?' scenario planning to manage resource demands. Compare multiple scenarios and determine which projects should proceed.

Complete Agile support

Manage your projects with both Waterfall and Agile techniques. Full support for Agile is included, with drag and drop task boards.

DataStore

Access the SQL data store that contains all your latest Project Online and SharePoint data as well as all changes for enhanced reporting, system integration and audit tracking.

Comprehensive management reporting

Completely transform your Project Online reporting, using pre-prepared templates for a range of standard reports such as a status or highlight report at both project and programme level. Use the existing standards, customise them or create your own.

Finance management

Manage all project financials in one location including budget, forecast and actuals as well as income, benefits and ROI. Easily integrate costs with your finance system.

Seamless planning

Integrated scheduling using Microsoft Project or Project Online. Build and control projects either online or offline with the shared scheduling engine. The familiar UI reduces time spent learning new tools.

Comprehensive device end user access

Use multiple devices to access information; Windows, iOS®, and Android™. Different users can use different devices and different browsers to suit their personal ways of working.

In-built collaboration

Template site designs for projects and programmes provide extensive built in collaboration features. Use Yammer to discuss each project through the easy to use UI.

Standards and templates

Pre-defined standards and templates to support major project lifecycles. Integrate your Project Lifecycle; Schedule; Risk, Issue and Document logs into templates that enable governance and standardisation.

A single source of Portfolio, Project and Resource data

edison365**projects** is changing the way organisations manage their projects and resources, providing them with the technology and management to drive success.
