Everything you need in one solution

edison365**projects** delivers on your project requirements:

Complete Agile and Waterfall support

Manage your projects with both Waterfall and Agile technique. Full support for Agile is included, with drag and drop task boards.

Detailed management reporting

Completely transform your reporting, using pre-prepared templates for a range of standard reports such as a status or highlight report at both project and programme level. Use the existing standards, customize them or create your own.

Finance management

Manage all project financials in one location including budget, forecast and actuals as well as income, benefits and ROI. Easily integrate costs with your finance system.

Enhanced task and risk visibility

With a Personal Tab, individuals have a highly intuitive board view of all their personal activities inlcuding tasks, risks and actions across every project. Users can easily update any item by simply dragging and dropping

Seamless planning

Prioritize, schedule and assign tasks quickly and accurately with a familiar UI. Anticipate dependencies and easily reschedule tasks with an unlimited number of Gantt charts.

Comprehensive device and user access

Use multiple devices to access information; Windows, IOS, and Android. Different users can use different devices and different browers to suit their personal ways of working.

In-built collaboration

Template site designs for projects and programmes provide extensive built in collaboration fecatures. Use Yammer and Teams to dicuss each project through the easy to use UI.

Standards and templates

You can tailor edison365**projects** to fit your needs with custom standards and templates. Pre-define data and tasks to support major project lifecycles, enabling governance and standization.
